(a)
Water amount × Watering frequency
Root/Shoot
Leaf nitrogen content (%)
Leaf chlorophyll content (mg/m2)
Trait value
Low
High
Watering frequency
Water amount
Wet
Dry
(b)
Water amount × Plant composition
Plant number per pot
Stomatal size (μm)
Root tissue density (g/cm3)
Conspecific
Heterospecific
Plant composition
(c)
Watering frequency × Plant composition
Total biomass per individual (g)
Leaf dry matter content (mg/g)
Osmotic potential (MPa)
Plant composition
